

Making Woodworking Tools

This course will use your woodworking skills to make some basic woodworking hand tools. The basic course is a pre-requisite or some woodworking skills are required. In the course you will make a mallet, marking gauge, Rabbet plane and design and build a customized Tool Tote to carry all your joinery tools. There will be 10 -3 hour classes. Each class will consist of a short period of instruction followed by shop time. The student will need to bring safety glasses and all the tools you would like to put in your Tote. There is a \$15 cost for supplies plus the cost of the lumber you want to use for your tote. The Class size limited to 4 students.
