

Course Content ECO TEAM -W SPRING 2023

We are a gathering of like minded people who know they can do more for the Environment when we work together. We have created actions such as EARTH Week ,symposiums with youth,and field trips to recycling centers. We have spoken in Olli classes throughout DE. In this way we educate ourselves so that we can inform other OLLI member about actions that can make a real impact on reducing waste (ECO PLASTIC collection), providing materials needed to pollinate our community gardens, reducing plastic bottles (installing refill stations), sitting on the UDEL Sustainability Council, organizing drives that reduce waste in all areas that pollute, and aim to become advocates and practitioners of a ZERO WASTE society. Come join us and be part of the solution.
