

Mexican Train Dominoes

(Extracurricular)

Instructors: Addie Cole and Mary McNeeley

Mexican train is a game played with numbered dominoes. The object of the game is to have the fewest points, after playing all rounds. The object of each round is to be the first player to place all of their dominoes.

Class participants will learn how to play the game. We will set up at least three tables to accommodate 4-8 players at each table. Those players who own sets might want to bring them so that we can accommodate more players and/or have smaller groups.
